

All DEBIs provided by practitioners in New York City:

Name of DEBI	Description
CLEAR: Choosing Life: Empowerment! Action! Results!	An evidence-based, health promotion intervention for males and females aged 16 and older living with HIV/AIDS or at high-risk for HIV. It is a client-centered program that delivers one-on-one using cognitive behavioral techniques to change behavior.
Connect	A six session, relationship-based intervention that teaches couples techniques and skills to enhance the quality of their relationship, communication, and shared commitments to safer sexual behaviors.
d-up: Defend Yourself!	A community-level intervention designed for and developed by Black men who have sex with men (MSM) to promote social norms of condom use and to assist Black MSM in recognizing and handling risk- related racial and sexual bias.
Healthy Relationships	A five-session, small-group intervention for men and women living with HIV/AIDS that focuses on developing skills and building self-efficacy and positive expectations about new behaviors through modeling behaviors and practicing new skills.
WILLOW: Women Involved in Life Learning from Other Women	A social-skills building and educational intervention for adult females living with HIV.
Partnership for Health	An intervention that uses message framing, repetition, and reinforcement during patient visits to increase HIV positive patients' knowledge, skills, and motivations to practice safer sex.
Project START	An individual-level, multi-session intervention for people being released from correctional facilities and returning to their communities.
Mpowerment	A community-level intervention for young gay and bisexual men of diverse backgrounds that aims to reduce sexual risk-taking, encourage regular HIV testing, and build positive social connections.
SHIELD: Self-Help in Eliminating Life-threatening Diseases	An intervention in which a peer educator is taught strategies to reduce HIV risk associated with drug use and sex behavior.
PROMISE: Peers Reaching Out and Modeling Intervention Strategies	A community-wide intervention in which a community assessment is conducted, peer advocates are recruited and trained from the target population, role model stories are written from interviews with the target population, and these stories are distributed, along with other risk-reduction materials, targeting audiences in order to help people move toward safer sex and/or risk-reduction practices.
RAPP: Real AIDS Prevention Project	A community mobilization program designed to reduce risk of HIV and of unintended pregnancy among women in communities at high risk, by increasing condom use.

Name of DEBI	Description
RESPECT: An Effective, Individual, Client-focused HIV Prevention Counseling Intervention	This intervention utilizes a client-focused, interactive HIV risk reduction counseling model.
VOICES/VOCES: Video Opportunities for Innovative Condom Education & Safer Sex	A group-level, single-session video-based intervention designed to increase condom use among heterosexual African American and Latino men and women who visit Sexually Transmitted Disease (STD) clinics.
PCC: Personalized Cognitive Counseling	An individual-level, single session counseling intervention designed to reduce unprotected anal intercourse (UAI) among men who have sex with men (MSM) who are repeat testers for HIV.
POL: Popular Opinion Leader	An HIV/AIDS risk-reduction program in which groups of trusted, respected community members are recruited and trained to conduct outreach focusing on a specific risk-influencing factor, or community norm, such as endorsement of safer-sex behaviors.
3MV: Many Men, Many Voices	A group-level intervention that addresses behavioral and social determinants and other factors influencing the HIV/STI risk and protective behaviors of Black MSM.
PfH: Partnership for Health	A one-on-one, brief provider-administered safer sex intervention for HIV-positive persons in care.
Safety Counts	An HIV intervention for out-of-treatment active injection and non-injection drug users aimed at reducing both high risk drug use and sexual behaviors. It is a behaviorally focused, seven-session intervention, which includes both structured and unstructured psycho-educational activities in group and educational settings.
SIHLE	A peer-led social skills building intervention aimed at reducing HIV sexual risk behavior among sexually active, African American adolescents ages 14-18.
SISTA	A 5-session, peer-led intervention designed to increase condom use among African American women.
